# How does California's accountability system work?

To help parents and educators identify strengths and areas for improvement, California reports how districts, schools (including alternative schools serving high-risk students), and student groups are performing across state and local measures.

For state measures, performance is based on two factors:

**1** Current year results, and

**2** Whether results improved from the prior year.

# How does California's accountability system work?

Performance on state measures, using comparable statewide data, is represented by one of five colors. The performance level (color) is not included when there are fewer than 30 students in any year. This is represented using a grey color dial with the words 'No Performance Color'.
